Education/Homeschooling

Mastering Essential MATH SKILLS

20 minutes a day to success

Richard W. Fisher

Veteran sixth-grade teacher Richard Fisher shares his proven system of teaching that motivates students to learn and produces dramatic results. Using Fisher's method, students quickly gain confidence and excitement that lead quickly to success.

Mastering Essential Math Skills offers:

- Proven system of teaching math for classroom teachers and for parents who are homeschooling.
- Easy-to-follow math program requiring only 20 minutes per day.
- Short, concise, and self-contained lessons.
- Daily exercises help students to master, maintain, and reinforce math skills through consistent review.
- Dramatic results. Each year about one-third of Mr. Fisher's sixth-grade students bypass the seventh-grade math program and move directly into eighth-grade algebra.
- Easy-to-use correction key and teacher's manual.

Educators say:

"Fisher's approach can withstand the test of time and any assessment to prove its credibility. He has developed an outstanding math program that has enabled our school, Bernal Intermediate, to be recognized in the state of California for exceptional mathematical achievement. When our students take the Golden State Exam in math the results have been extraordinary. I have not found a more effective way to teach mathematics."

—Henry Castaniada, principal

"The book is well designed with rigorous drill and practice for all ability levels. It supplements any state-adopted textbook. Students excel when they enter the intermediate level because they are extremely proficient in their basic mathematical skills. I have personally seen impressive results."

—Lowell Russel, intermediate school math teacher

"I used this book in my home school this year and all three of my kids tested many grade levels above average. Great book!"

—K. Slattery, homeschool parent

"This is by far the best math workbook we've ever used. I wish I had found this one long ago, before I wasted my money on the others."

—homeschool parent, homeschool parent

"If your fourth- or fifth-grader is struggling in math, they need this book. My son finally understands concepts he struggled with so much with his regular school text."

—Mary Edwards, homeschool parent

Students say:

"I used to hate math, now it's my favorite subject."

"I've learned more in the past year than in the last three combined!"

"Math is fun."
